### **DETAILED ACTION**

1. The indicated allowability of claims 2-5 and 8 is withdrawn in view of the newly discovered reference(s) to Friedman. Rejections based on the newly cited reference(s) follow.

#### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

a. Claims 1, 3-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Friedman. Friedman discloses all of the limitations of the claimed invention except for brackets as coupling members. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Friedman such that any type of coupling mechanism is capable of securing two elements together for pivoting.
